

Attila '08

Is your neighbourhood changing in ways you don't like? Are you sick of tried and true solutions like democracy and calling the police?

Attila prefers draconian solutions too. Remember, rule of law doesn't exist to make you feel safe, it exists to make everyone equally terrified of the police and the military. Bring back the terror that ended with the cold war, so that the next generation will not be deprived of the paranoia that you felt when you were young. Make enemies of half the world, so that no one anywhere will be at peace.

Are you against trial by jury, fair treatment of prisoners, and the age-old idea of innocent until proven guilty? Do you think human rights only apply to you and not to your enemies?

Attila is working with governments around the world to put an end to fair treatment of anyone suspicious looking. Political parties worldwide have heard the hysterical pleas of lunatics like you and are doing what they can to undo two thousand years of advances toward liberal democracy.

Do you think it's time to bring autocracy back into practice?

Attila is all for changing the law to get rid of gridlock, so that the commander in chief has more power to do what he wants, when he wants. If you support Attila, you can kiss the pesky opposition goodbye.

Does your country have a constitution that you couldn't bother to read?

If so, you could help make it obsolete by voting for Attila. Why bother learning about the freedoms your forefathers fought for? Why not just let the big politicians lie to you instead?

Come on, you got better things to do than worry about your freedoms, like watch the football or check out some politico's latest book. Don't think for yourself, Vote Attila instead.

Make a mockery of democracy. Vote Attila today!
